PARABIT
Enhancing Self-Service & Improving Security

STAINLESS STEEL RAILING DISPLAYS

GLASS & STAINLESS STEEL RAILINGS

Parabit manufactures a wide selection of stainless steel railing displays that combine the strength of stainless steel with engineering and creativity. Our stainless steel railing displays offer custom distinctive designs to accommodate small or large areas for both commercial or residential applications. All displays are designed and engineered to meet or exceed most local building codes. Standard finishes are brushed and polished stainless steel, with custom powder coating finishes vailable on special order.

Function

Parabit's durable stainless steel railing displays are designed to provide crowd control, safety and security to facilities with large or small visitors gathering areas. In addition to providing security and order, our top of the line designs enhance the appearance of the facility. Our designs are engineered to support digital signage, wayfinding and transportation information.

Applications

- Airports
- Shopping Malls
- Transportation Hubs
- College Campuses
- Office Buildings
- Retail Space
